PROFESSIONAL SUMMARY

Full Stack Developer focused on building business applications, operational dashboards, and internal tools that help organizations improve efficiency and streamline business processes.

My career began with desktop application development using Borland Delphi, where I built inventory, asset management, purchasing, sales, and reporting systems. This foundation provided strong expertise in business workflows and operational requirements.

Today, I specialize in modern web development using Laravel, React.js, Next.js, Node.js, TypeScript, and MySQL. Experienced in developing asset management systems, monitoring dashboards, reporting platforms, POS systems, and custom business applications. Passionate about delivering scalable, maintainable, and user-friendly software with clean architecture and high performance.

CORE SKILLS

Frontend

React.js • Next.js • JavaScript • TypeScript • HTML5 • CSS3 • Tailwind CSS • Bootstrap

Backend

Laravel • PHP • Node.js • Express.js • REST API Development

Database

MySQL • PostgreSQL • MongoDB • TiDB

DevOps & Deployment

Docker • Nginx • Linux • Render • Railway • Vercel

Tools & Collaboration

Git • GitHub • Notion • Postman

Workflow Automation

PROFESSIONAL EXPERIENCE

Full Stack Developer | Eka Jaya | 2024 – Present

- Develop and maintain business-critical web applications using Laravel, React.js, Next.js, and Node.js.

- Design scalable database structures and application architectures aligned with business requirements.
- Optimize application performance, security, and maintainability in production environments.
- Collaborate with stakeholders to translate business requirements into reliable software solutions.

Software Developer (Web) | Mabarroh Cahaya Megah | 2020 – 2023

- Developed web applications using Laravel, PHP, JavaScript, and MySQL.
- Built RESTful APIs and responsive interfaces for internal business systems.
- Migrated business processes from desktop applications to web-based solutions.
- Improved system performance and database efficiency.
- Collaborated with stakeholders to deliver business-focused software solutions.

Software Developer (Desktop) | Mabarroh Cahaya Megah | 2013 – 2020

- Developed desktop applications using Borland Delphi and MySQL..
- Built inventory, purchasing, sales, and reporting systems.
- Maintained and enhanced legacy business applications..
- Designed and optimized relational databases.

SELECTED PROJECTS

Asset Management System

- Technologies: Laravel, React.js, MySQL
- Developed a centralized asset management platform for tracking asset lifecycle, maintenance schedules, asset transfers, and reporting..

Monitoring & Reporting Dashboard

- Technologies: NodeJS, React.js, Chart.js
- Built an operational dashboard providing KPI visualization, reporting, and real-time monitoring for management decision-making.

Inventory Management System

- Technologies: Laravel, MySQL
- Developed inventory tracking and stock management features supporting purchasing, warehouse operations, and reporting.

POS System

- Technologies: Laravel, MySQL
- Built a point-of-sale application supporting transactions, inventory synchronization, and sales reporting..

EDUCATION

Widyatama University

Bachelor's Degree in Informatics Engineering

2015
